EXPERIENCE

Associate Software Engineer

ScaleForge Information Technology Solutions | Singapore | May 2026 – July 2026

- Developed backend authentication features using **Node.js and TypeScript**, implementing **Google reCAPTCHA v3** for secure login and account management workflows serving **10,000+ users**.
- Contributed to the rollout of a new authentication architecture across **6 web platforms** and enhanced the **Verification Lock** feature using asynchronous processing and feature-flagged deployments.
- Collaborated with cross-functional engineers in a **Kanban** environment, participating in code reviews, debugging, testing, and production deployments.

Lead Backend Developer

Simplevia Technologies Inc. | Ortigas, Pasig City | August 2025 – May 2026

- Developed and maintained backend APIs using **C# .NET and Microsoft SQL Server**, delivering **3 major modules with 20+ endpoints per module** for production financial applications while collaborating with a **6-member development and QA team** in an Agile environment.
- Designed and optimized **50+ SQL stored procedures, views, and database objects**, reducing query execution time from approximately **5 seconds to 1 second** through query and database optimization.
- Optimized backend API performance, reducing response time from approximately **2 seconds to 500ms (~75% improvement)** while performing debugging, testing, data validation, and supporting **CI/CD and production deployments**.

PROJECTS

Authentication and Security Enhancement for a Multi-Site Online Platform

- Implemented **Google reCAPTCHA v3** and contributed to a new authentication architecture deployed across **6 web platforms**, strengthening login and registration security for **10,000+ users**.
- Enhanced the **Verification Lock** feature using asynchronous processing and feature-flagged deployments, supporting controlled authentication releases, debugging, and production improvements.

Finance Management Information System – Database and API Development

- Developed APIs across **3 application modules with 20+ endpoints per module**, supporting financial management operations and integrating backend services with database functionality.
- Designed and optimized **50+ SQL stored procedures, views, and database objects**, reducing query execution time from **~5 seconds to ~1 second** through database and query optimization.

Community Digital Management System – Database, API and HERE Maps Integration

- Designed the **initial database structures and backend APIs**, establishing the foundation for the application's data and service layer.
- Integrated **HERE Maps across multiple location-based features**, enabling frontend geolocation and interactive map visualization while supporting API deployment and testing.

EDUCATION

BS in Information Technology – Specialized in Web and Mobile App Development

Bulacan State University – Main Campus | Magna Cum Laude | Dean's Lister

TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript, TypeScript, C++, HTML, CSS

Backend: .NET (Entity Framework), Node.js (Express), Django, GraphQL

Frontend: React

Databases: Microsoft SQL Server, PostgreSQL, MySQL, MongoDB

Cloud & Deployment: AWS (Lambda, API Gateway, Cognito, RDS, S3), IIS (Internet Information Services), Docker

Development Environment: WSL (Ubuntu), Git, GitHub, Visual Studio, Visual Studio Code, SQL Server Management Studio (SSMS), Robot Framework, Android Studio

Networking & Remote Access: OpenVPN, Teleport

Practices: REST API Development, Authentication & Authorization, CI/CD Concepts, Agile/Kanban, Debugging, Testing, Feature Flags, System Integration

TRAINING AND CERTIFICATIONS

- AI Fundamentals: Foundations for Understanding AI – IBM SkillsBuild (2026)
- Civil Service Commission (CSC) Certificate of Eligibility (2025)
- SpeakIT: Unlocking the Power of Effective Communication – Bulacan State University (2024)
- Salesforce Admin Trainee Program (15 Superbadges) – Bulacan State University (2023)
